Ground Mounted Solar Farm – Land north of Lullington, Derbyshire

Lanpro planning consultants invites you to view and comment on the draft proposals for a ground mounted solar farm on the land located north of the village of Lullington, between the Edingale-Coton road, Lullington-Coton road, and the Lullington-Crossroads Wood road (as indicated overleaf). The proposals are being consulted on behalf of the developer Island Green Power.

The site covers an area of approximately 70 hectares (170 acres). The proposed development will include ground mounted solar panels along with associated infrastructure including substation, battery storage, CCTV cameras and fencing.

Given the current restrictions around COVID-19, it is considered appropriate that the public consultation is undertaken online.

The proposals will be available to view via the following website between 27 November and 11 December 2020.

www.lanproservices.co.uk/lullington

We hope that you will be able to view the proposals and share your thoughts on the evolving plans via the webpage.

Alternatively, if you are unable to view the website, please write to us at the address below to request a copy of the consultation material.
